

## **List of Topic for Course Project**

**Choose Your Project from the following topics**

1. Object Detection and Object Classification
2. Navigation and path planning using Recurrent neural networks and LSTMs (Data will be given)
3. Learning and robotics using Reinforcement learning (Data will be given)
4. Autonomous vehicles using Recurrent neural networks and LSTMs (Data will be given)
5. Image segmentation and Edge detection using Convolutional neural networks
6. House Price Prediction in Ontario
7. Credit Card Fraud Detection
8. Face Recognition using CNN
9. Text Classification
10. Image Analysis using K-Means Clustering
